Adrian Milano, S.Pd

Kramat Jati, Jakarta Timur · (+62) 8112-175-175 · arm.adrian02@gmail.com

I am a highly passionate IT and programming enthusiast with expertise in both frontend and backend development. I am an energetic programmer who is dedicated to delivering high-quality results in all my projects.

Based on my previous experience, I have worked as both a web frontend and backend developer. I am passionate about my work and am comfortable working under pressure. Additionally, I enjoy collaborating with a team to achieve a common goal.

I have a strong curiosity and a deep passion for learning new things, especially in the field of IT and programming languages.

Experience

Senior Frontend Developer
February 2022 - Present

PT. Ako Media Asia (SALT)

As a senior frontend web developer who specializes in using the Angular programming language, I assist in the development of micro-based applications for clients, particularly Telkomsel, utilizing clean architecture methods, trunk-based development, and test-driven development practices. Additionally, I employ Scrum for project management.

Tech Manager
December 2021 - Present

PT. Media Baru Internasional (MoGawe)

As a technology manager, my responsibilities include conducting research to implement the latest technological advancements and leading a team of frontend web developers skilled in Angular, backend developers using Java Spring Boot, and mobile application developers proficient in Flutter. I also oversee server management using the Google Cloud Console and maintain direct coordination with the CEO to

Senior Frontend Developer
August 2020 - December 2021

PT. Media Baru Internasional (MoGawe)

As a web frontend developer skilled in Angular, I specialize in developing micro-based applications, including work management and data research applications. I also implement Scrum project management methodologies to ensure the success of my projects.

Fullstack Developer
CV. Inti Multi Solusi

July 2018 - Present

As a full-stack programmer, I have expertise in using various programming languages and frameworks such as Laravel, CodeIgniter, Android Native, and Node.js. My work involves developing various applications and IT solutions for clients, with a focus on government clients such as the Ministry of Communication and Informatics, the Ministry of Investment, and the Ministry of Social Affairs.

Junior Frontend Developer
PT. Seva Space (Virallo)

April 2018 - September 2018

As a junior frontend web developer proficient in Angular, my role involves developing web applications to manage investment programs and other applications such as danalaut.id.

Junior Fullstack Developer Intern
PT. Artivisi Intermedia

April 2017 - August 2017

I am completing an internship as a requirement for graduation from vocational high school, where I am learning to use Java and Laravel programming languages.
